

AVLT-DM45-1

Heavy-Duty Premium New Top Mounting Desk Mount - Single

AP4-0139A

Base Installation - Clamp Style

Step 1
Fit clamp over the edge of the desk in desired location and tighten using provided Allen wrench.

Step 2
Clamp may also be fitted into the cable guide hole featured on some desks. Insert the bottom half of clamp into opening and tighten into place

Arm Installation

Step 1
Install arm onto base. Note upper and lower arm sections should be secured together using provided screw.

VESA Bracket / Monitor Installation

(PC monitors up to 35" or UltraWide 38" and 30.8lbs/14kg)

Step 1
Lay monitor on a flat surface. Using the provided monitor screws(M4) secure VESA bracket to the back of monitor.

Step 2
Install monitor onto arm. Align VESA bracket to opening and slid into place.

Adjust Arm Tension

Step 1

In order to adjust the tension of the monitor arm according to the weight of the monitor the arm must be lowered to a horizontal position.

Step 2

Using the provided Allen wrench adjust the arm's tension to hold your arm in the proper position. Rotate the wrench counter-clockwise (+) to tighten the arm for heavier monitors. And rotate the wrench clockwise (-) to loosen the arm for lighter monitors.

Step 3

Using the provided Allen wrench to tighten the screws for heavier monitors.

Cable Management

Monitor cables may be threaded through the upper and lower arm section in order to complete the installation.

Note: An allowance of extra cable should be left to accommodate arm movement.
